Remote-support to optimize the effectiveness of your Vorne XL™ Productivity Appliances

XL Config Review Program
1-10 Vorne XL Units

The Challenge

You are focused on your plant's operations and need help getting results. Fast!

You have installed and are using Vorne XL Productivity Appliances. You need help with how they are configured because you are trying to fix a specific issue or you feel that they could be optimized. You know there can be a better way, and don't have the time to analyze each configuration.

The Solution

The XL Appliance is designed so that your team can deploy it quickly and easily, so why would you want an XL Deployment Expert to visit your site? When you want to get outstanding results. Fast.

XL Configuration Review Program is a remote service with a couple of follow up calls with an experienced XL Deployment partner who will work closely with your team to analyze and compare XL configurations which help to identify any inconsistencies so that you can make informed decisions to optimize your Vorne XL investment.

- 1-hour conference call to understand your high-level process and gain understanding of the specific Vorne XL problems that you need help with.
- Provide us with your XL configuration files
- We will review and document your configuration files and make recommendations with screen shots to solve the problem(s).
- 1-hour follow-up conference call explaining the solution and work with you to implement it. Providing you with the confidence that you understand your Vorne XL configurations. (We do not update your configuration and send it back to you)

Audience

Experienced Vorne XL user responsible for programming the units.

Price

Cost: $995

All Vorne XL Deployment Experts are experienced manufacturing professionals with genuine hands-on experience running and improving manufacturing processes who have completed extensive training and verification by Vetii|GROUP and Vorne Industries.

Our Process

1. XL Config Analyzer Tool: Import each of your config files into our proprietary XL Config Analyzer Tool.

2. Analyze Configs: Compare configurations between each XL - highlighting the differences in an easy to read format.

3. Identify & Recommend Changes: A process map of the XL programs showing current problem and recommended fix. These are tested in our labs to ensure they work.

4. Documented Configurations We deliver an easy to read document for each of your XL Configurations.

"XL Config Review Program" saves you time so that you can focus on your plant's operations.
